DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The following amendment to the claims was approved by Gang Luo, Reg. No. 50,559, on 11 September 2006.

The application has been amended as follows:

In the Claims:

Claims 4, 5, 16, and 17 have been cancelled.

In claim 11, the phrase "of claim 3" has been replaced with "of claim 1".

In claim 23, the phrase "of claim 15" has been replaced with "of claim 13".

In the Specification:

The title has been replaced with "Optical device having a plurality of optical modulator units, projector equipping the same, and particular heat insulation".

End of examiner's amendment.

Allowable Subject Matter

2. Claim 1 is allowable. The restriction requirement between species A1a and A1b, as set forth in the Office action mailed on 6 December 2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 9 and 21 are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. (The restriction requirement between species A1 and A2 is not withdrawn; the amended claim 1 is not generic to these species; claims 4, 5, 16, and 17 have therefore been cancelled.)

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Claims 1, 2, 6-14, and 18-24 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the device of claim 1, in particular the limitations that for each incident surface there is a first heat conductor plate bonded to the incident

Art Unit: 2871

surface, a first exit polarizer plate bonded to the first heat conductor plate and attached with heat insulation pins, on which is a polarizer-plate holding frame to hold a second heat conductor plate bonded with the second exit polarizer plate and a liquid crystal panel holding frame for holding the liquid crystal panel. Claim 1 is therefore allowable, as are its dependent claims 2, 6-11, 13, 14, and 18-23.

Similarly, the prior art does not disclose the device of claim 12, having the same distinguishing limitations. Claim 12 is therefore allowed, as is its dependent claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,935,753 to *Takezawa et al.* discloses [see Fig. 19] a color-combining unit, plate with pins, and LCD, but the first and second exit polarizer plates are incorporated into the LCD [310G] rather than being bonded to heat conductor plates as recited in the present claims.
